Address: Kayabaşı Mah. Cumhuriyet Avenue No22

MY SCHOOL

- Our school is located in Göksun, Kahramanmaraş which is one of a beautiful city of Turkey. Even if the school was established just 20 years ago and has a short history, it has been a well known school in the region. It is a well equipped school with a nice building. We are one of the best-known schools of the town due to its good quality of education and the great success in university entrance exam. There are about 308 students, from the 9th to the 12th grade, between the age of 15 and 18.

LESS OPPORTUNITY

LIBRARY

- We offer classes of Social Sciences, Mathematics, Computer Science, Foreign Languages (English and German) arts and Sports but as we are a school specializes in arts and sports, one of our priorities is to help students to be successful in these branches.
- Even if we have English and German classes in each grade of our high school, the students don't have the chance to practice as they are stuck in this district and there are not many tourists visit here.
- Although our students are really skillful in arts and sports, they can improve themselves as much as they see and unfortunately they are limited with this town because they can not go even to other cities.
- And thanks to this project, our pupils will have the chance to improve their language and art skills, to go to partner countries, to know new people, to learn about new cultures as it is obvious that they can not do any of these by themselves or with their poor economy.

QUALITY OF EDUCATION

- We want to transfer new pedagogical approaches, techniques, methods and good practices to our curriculum from our partner countries and improve the quality of education in our school. We also want our students to have a European perspective. Especially now when Turkey is about to be a member of the European Union and it is our priority to contribute to the participation process of Turkey to European Union, we want to ensure that our pupils become more active European citizens in future and to help the students become the adults of a multicultural inclusive society. And as this project is about cinema and as cinema is a very important branch of art, we believe that it will help us to improve our students' artistic and ICT skills a lot.

THE END

THANK YOU
